

V20

Stairs components

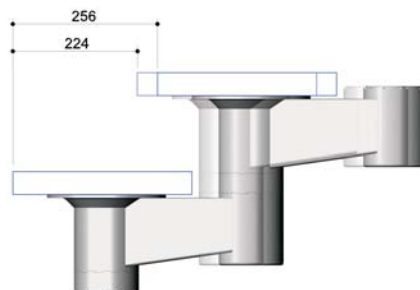

D'
OPERA

Rotazione struttura 30°

Pedate rampe 256 - 224

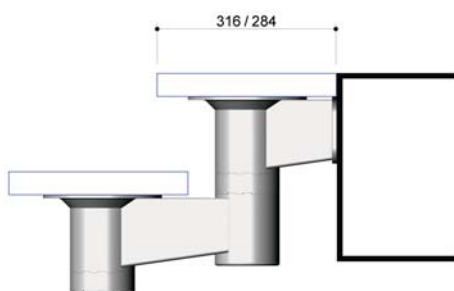

Alzata partenza 188

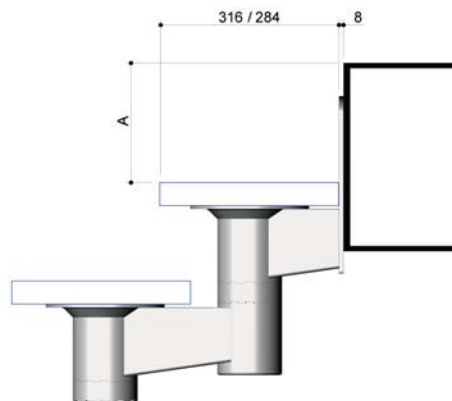

Alzate regolabili a passi di 5 da 175 a 235

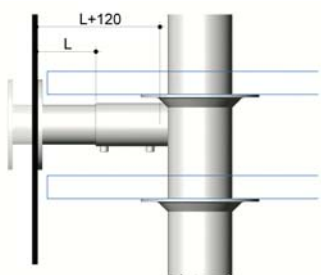

Pedate rampa sbarco in quota

Pedate rampa sbarco sottoquota

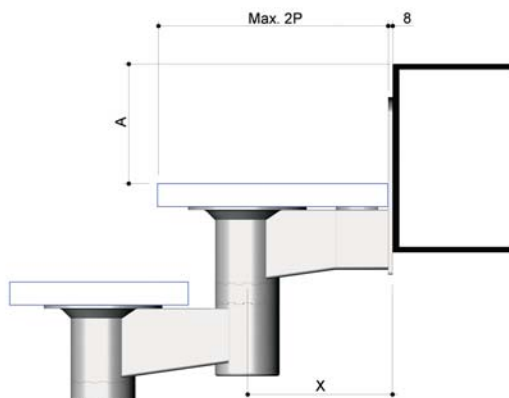

Fissaggio struttura a parete

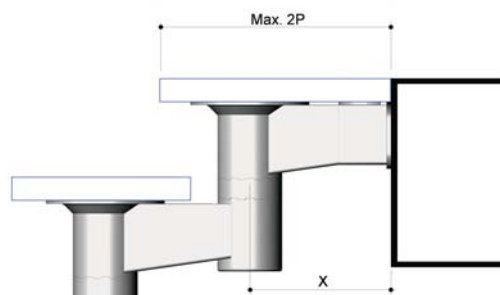

Fissaggio struttura a pavimento

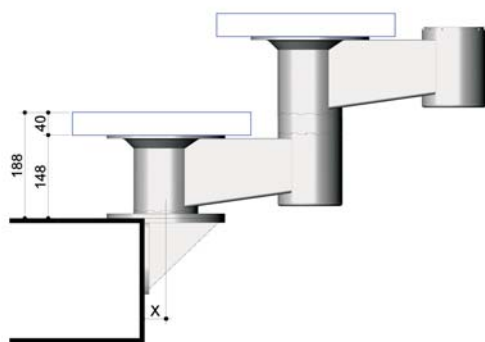

Sbarco sotto quota con pedata maggiorata

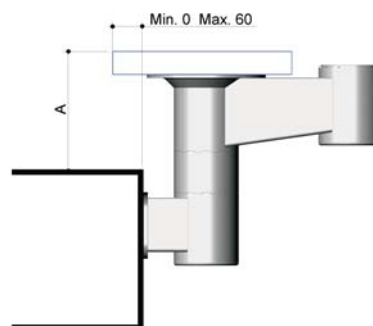

Sbarco a in quota con pedata maggiorata

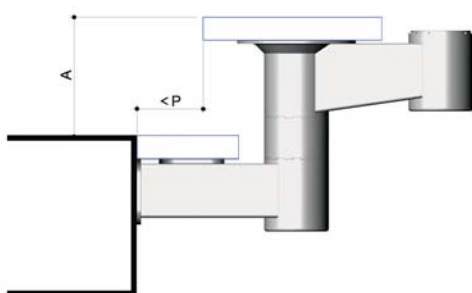

Partenza a sbalzo con fissaggio a pavimento

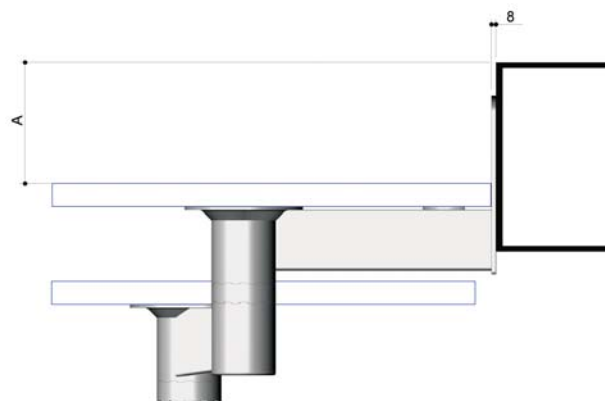

Partenza a sbalzo con fissaggio contro solaio

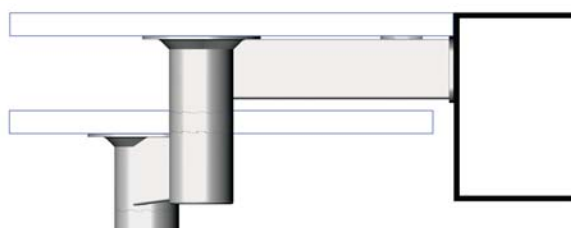

Partenza a sbalzo con fissaggio con soglia a filo pavimento

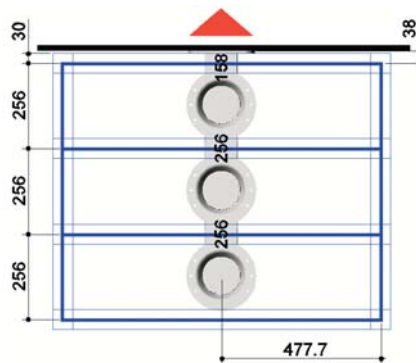

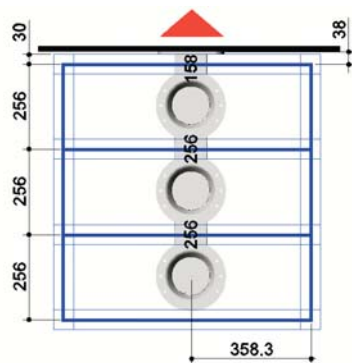

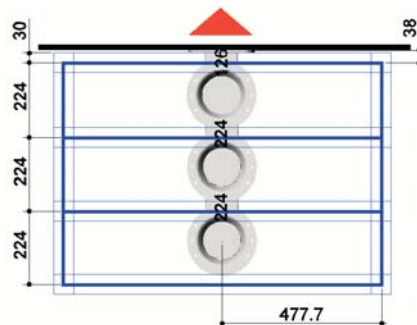

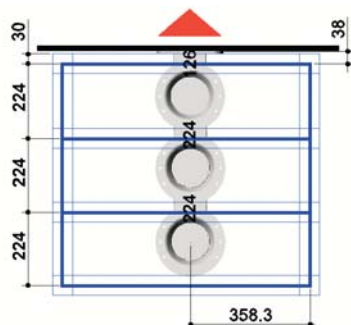

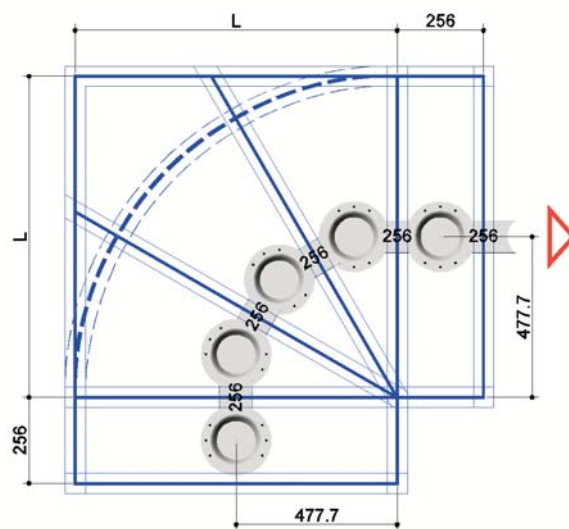

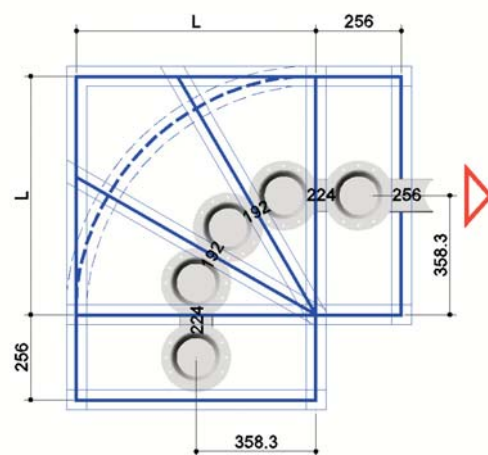

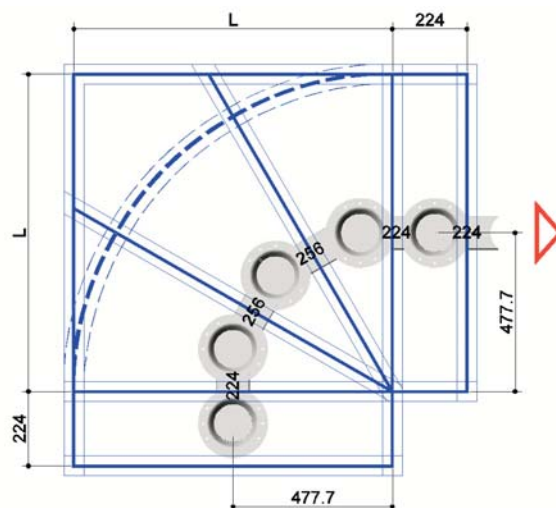

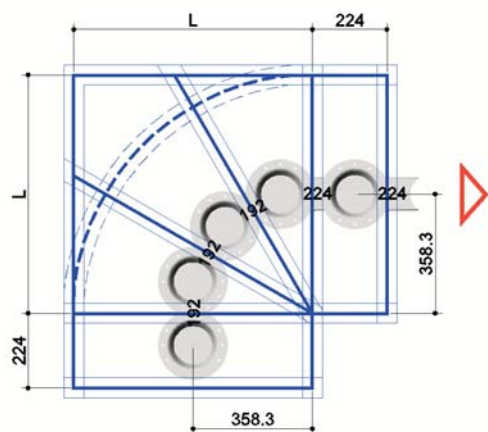

Sbarco pianerottolo conformazione elicoidale sotto quota

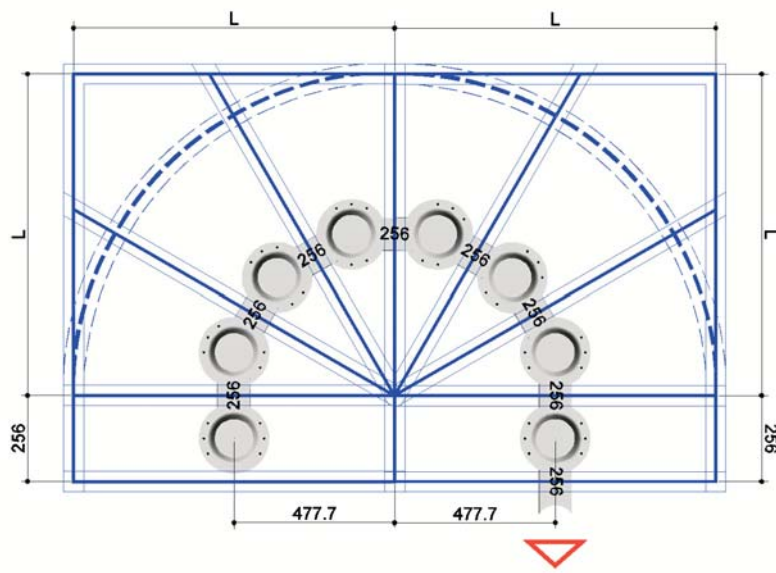

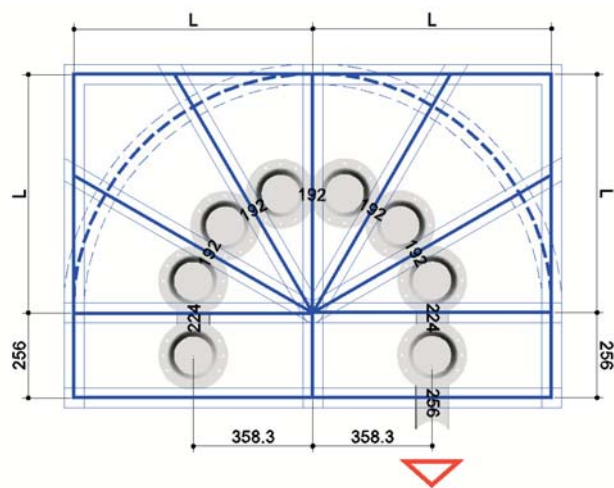

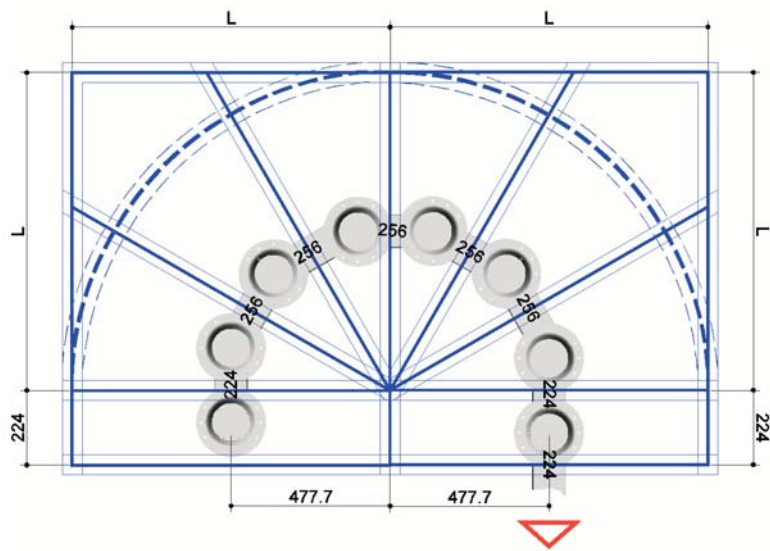

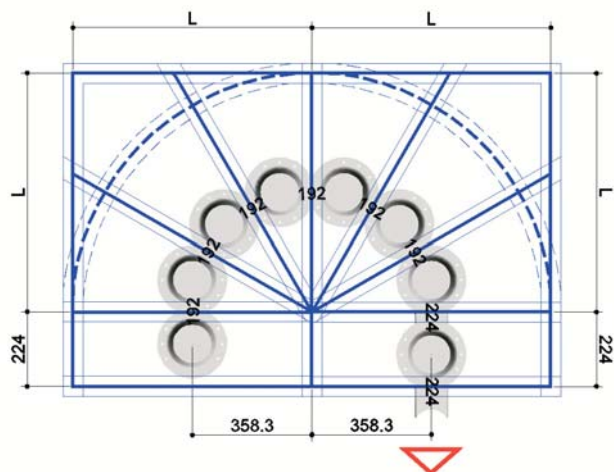

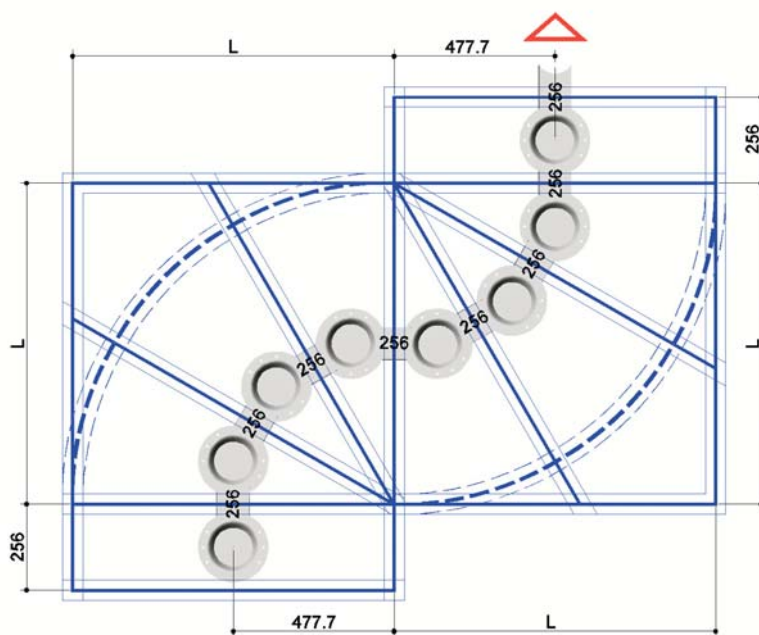

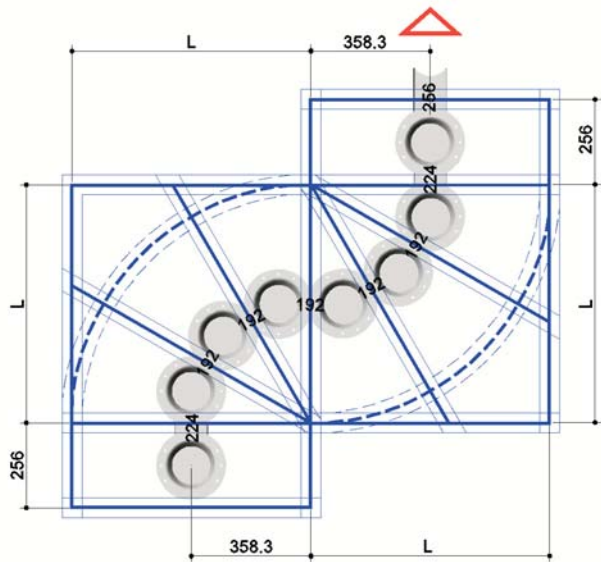

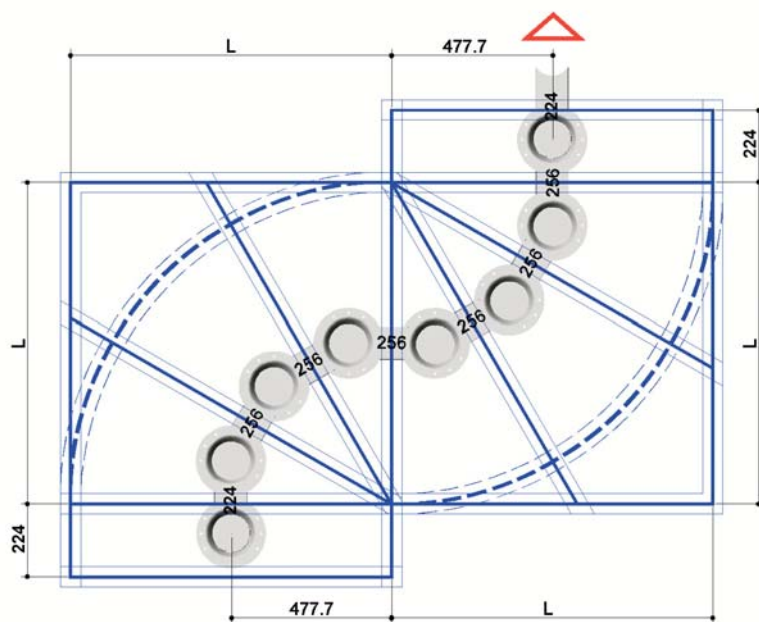

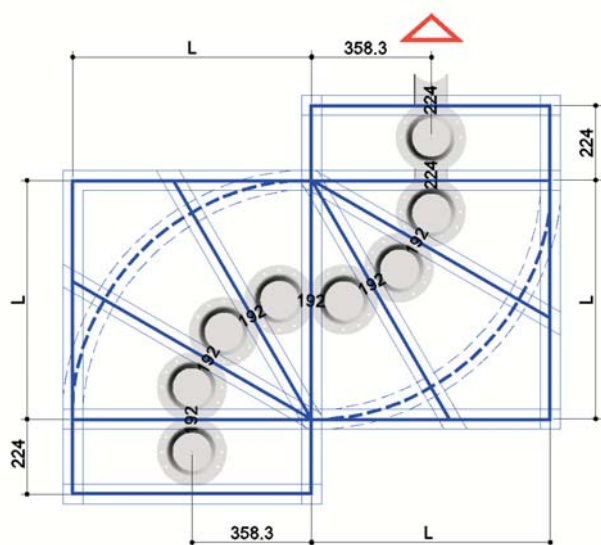

Sbarco pianerottolo conformazione elicoidale in quota

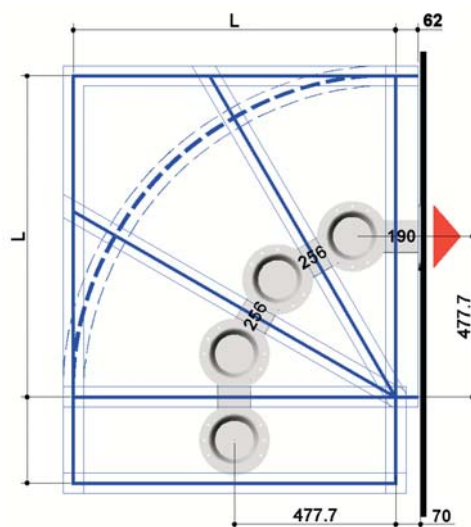

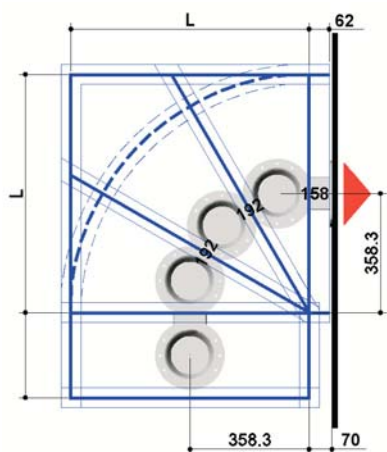

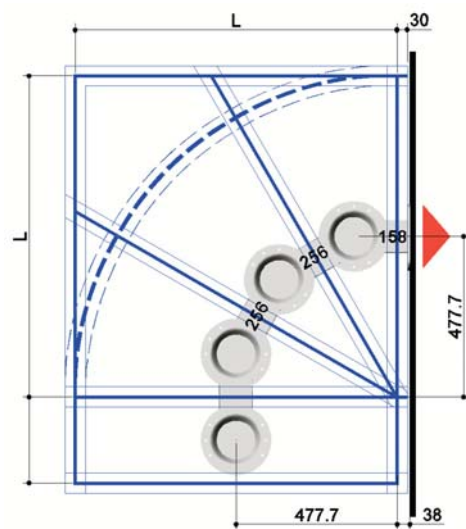

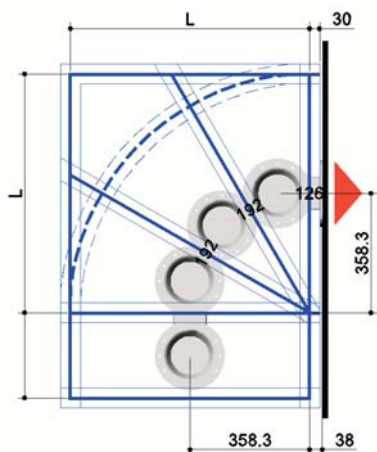

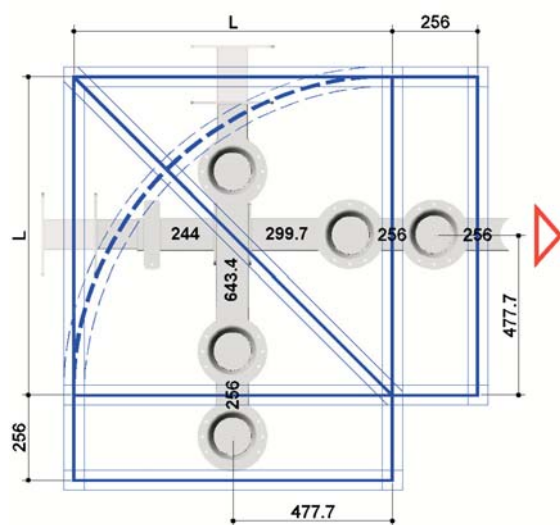

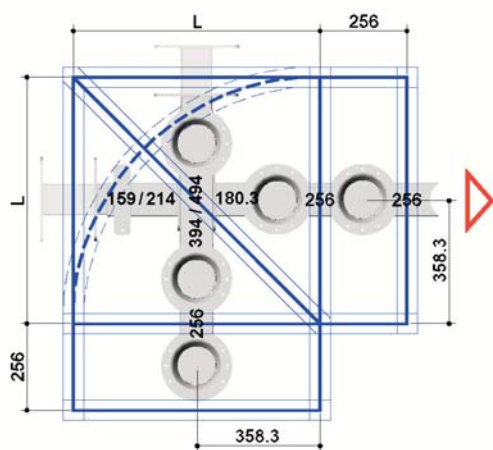

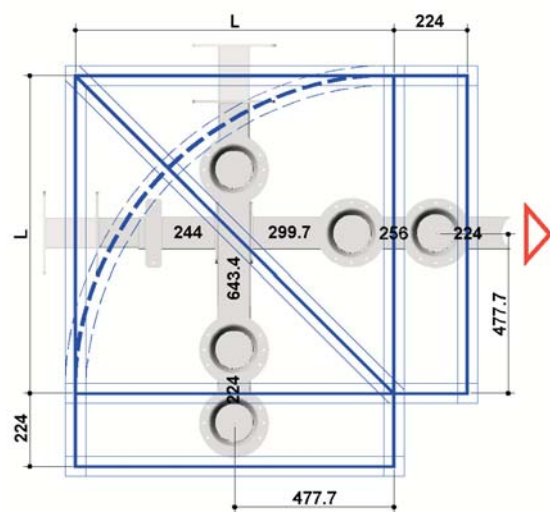

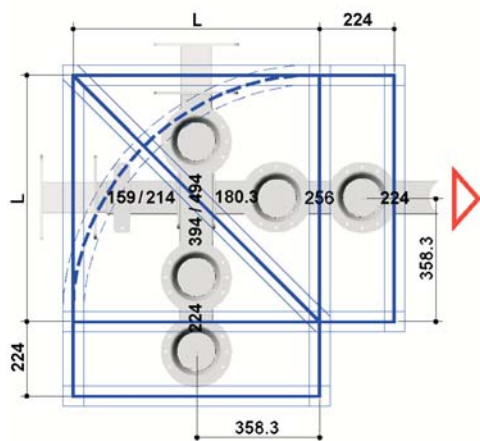

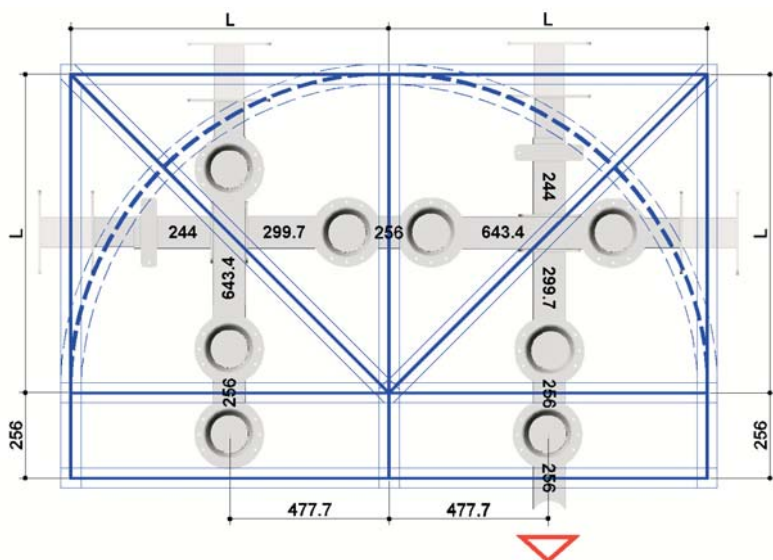

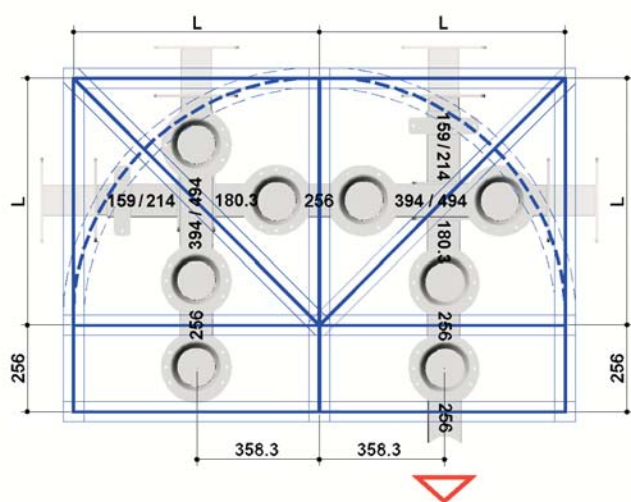

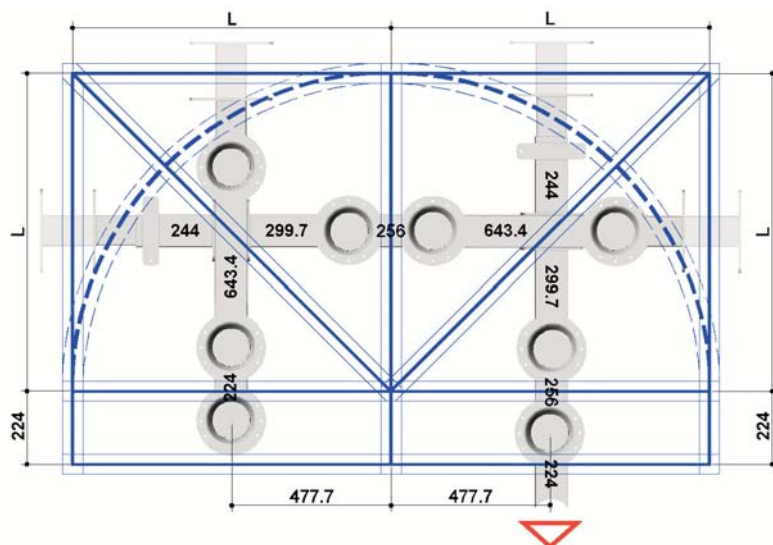

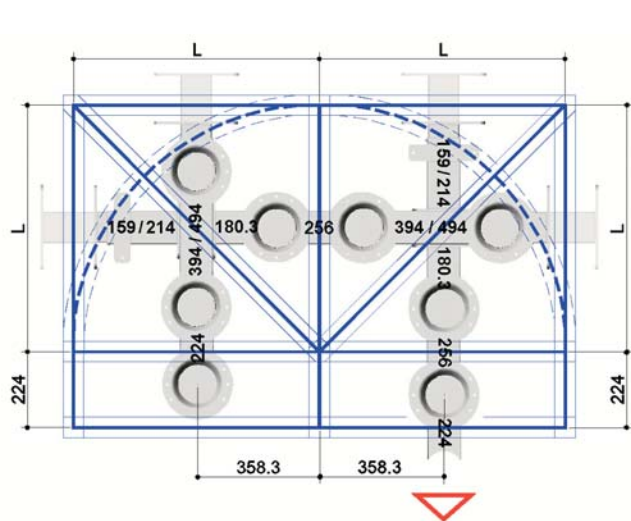

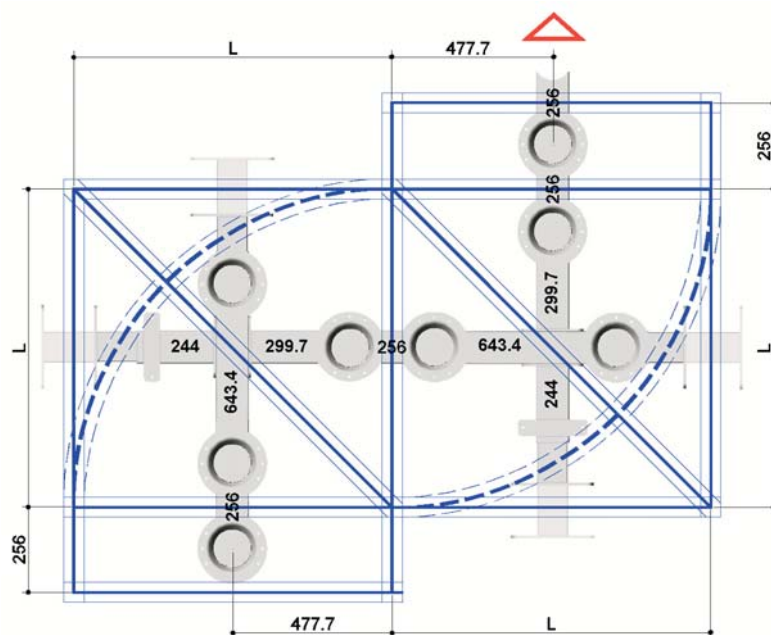

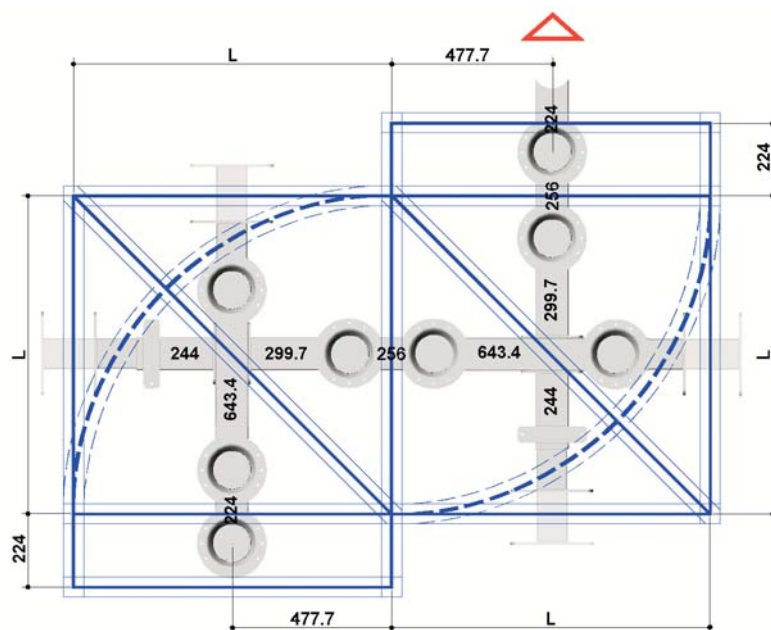

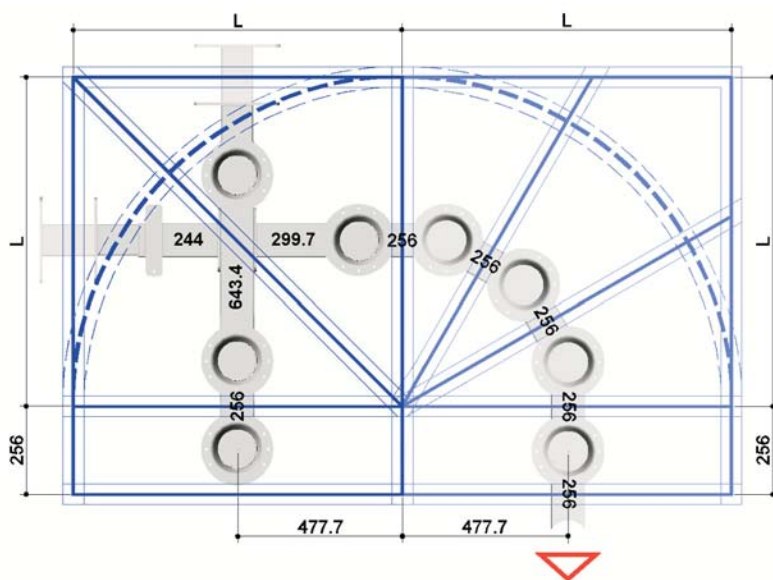

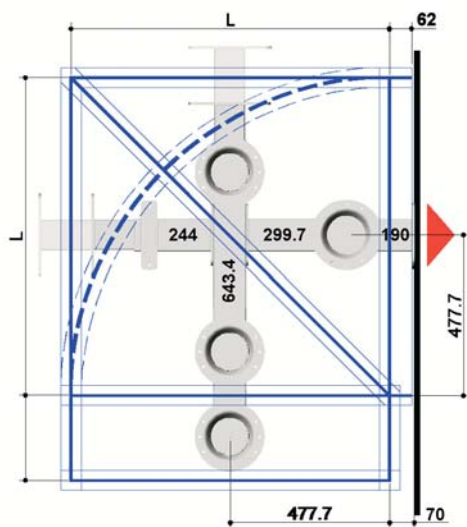

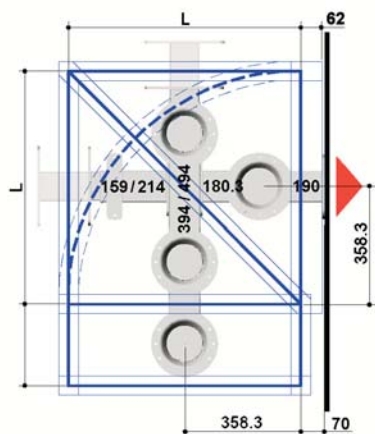

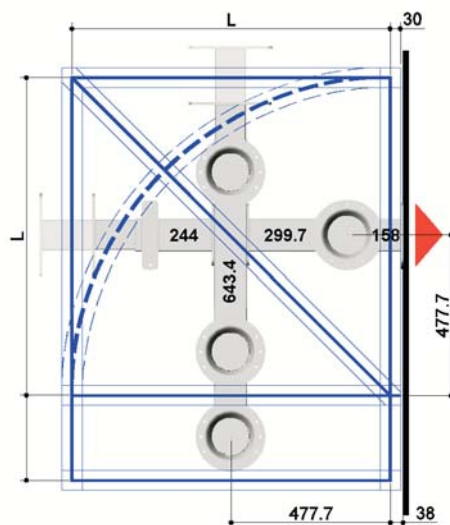

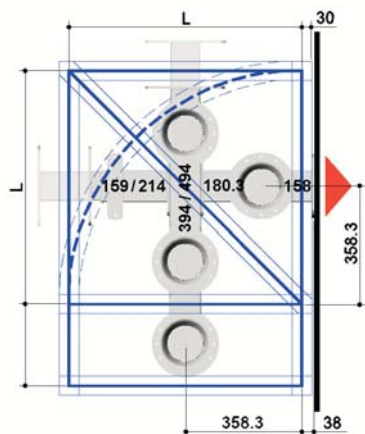

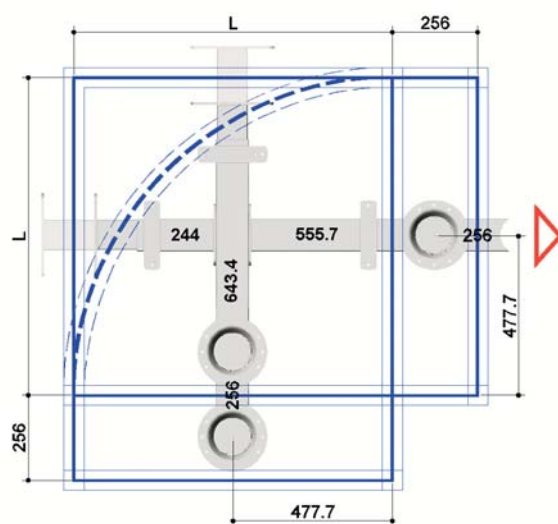

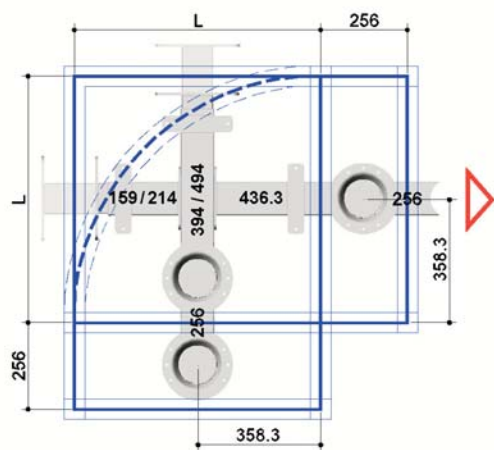

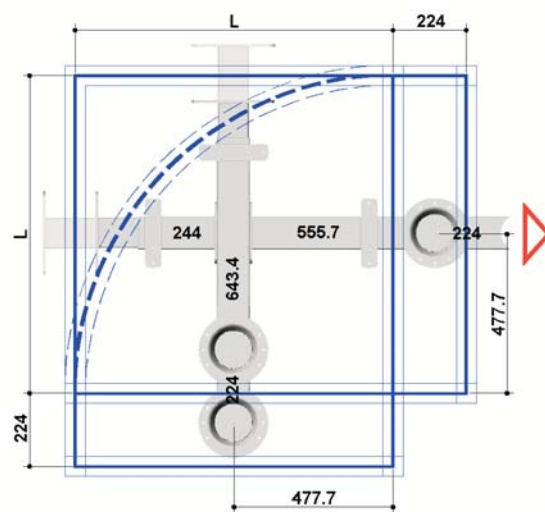

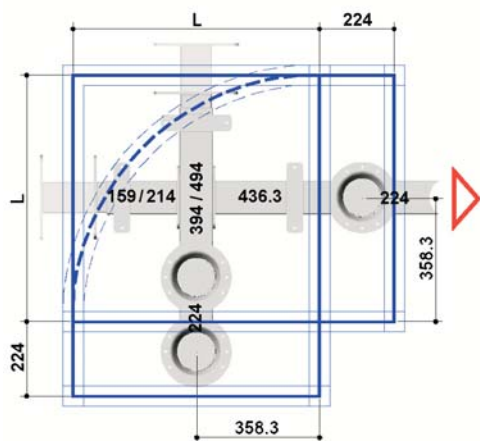

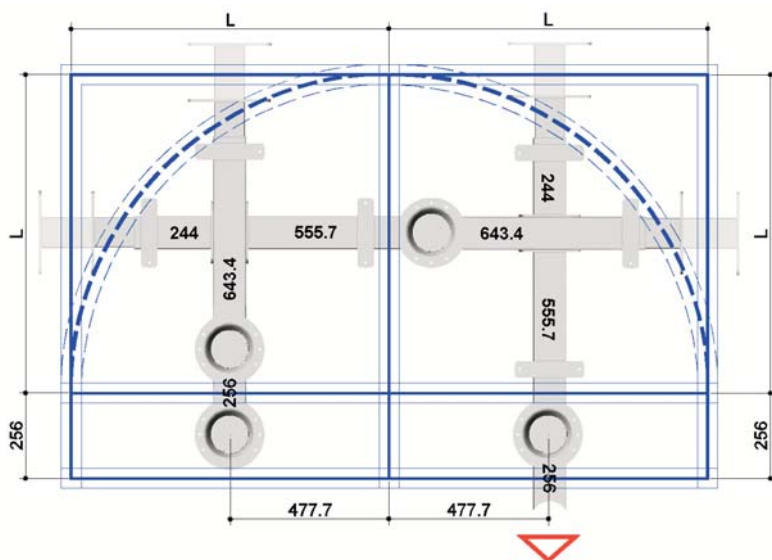

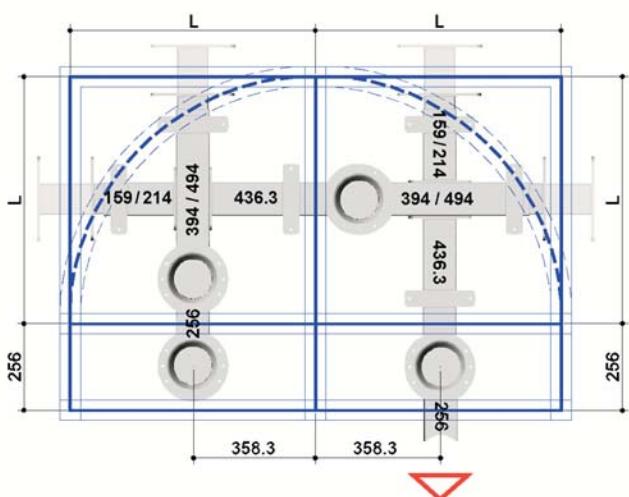

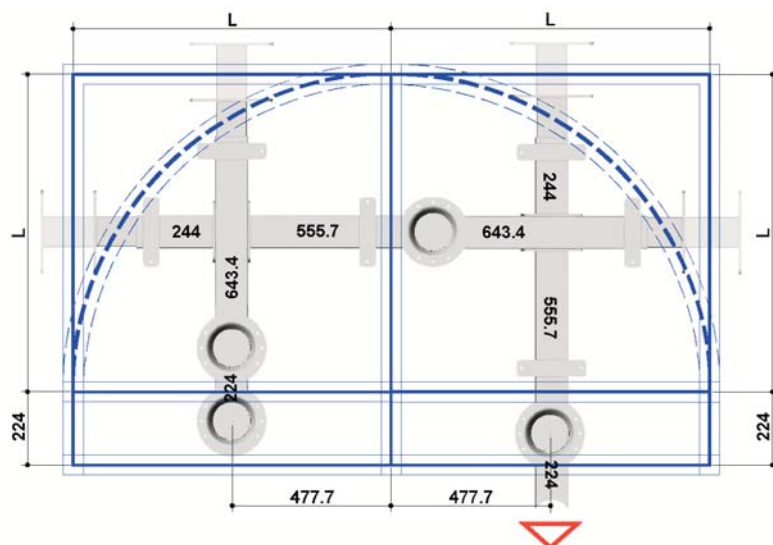

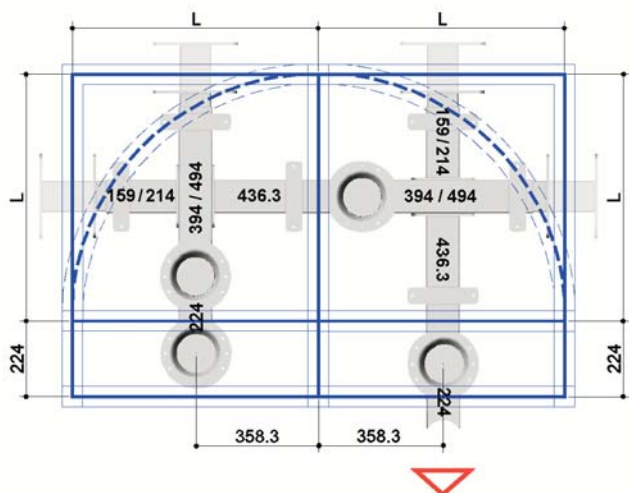

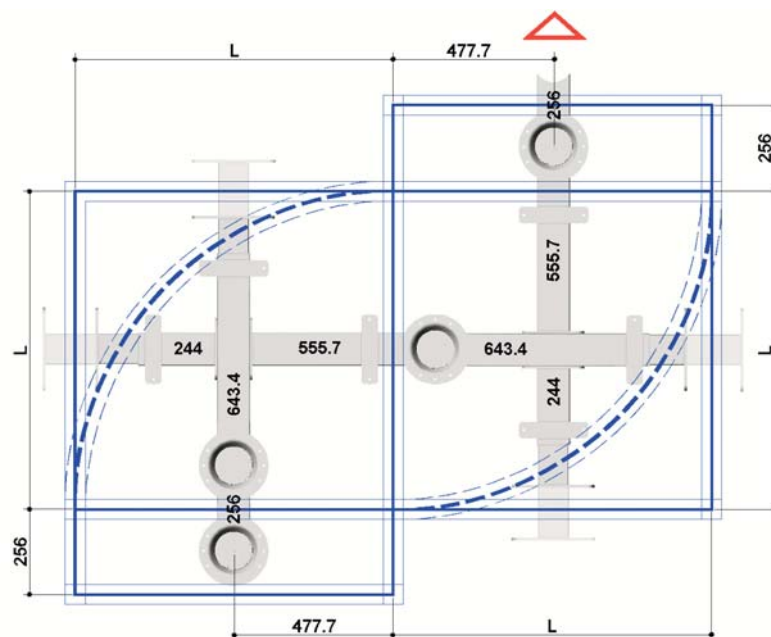

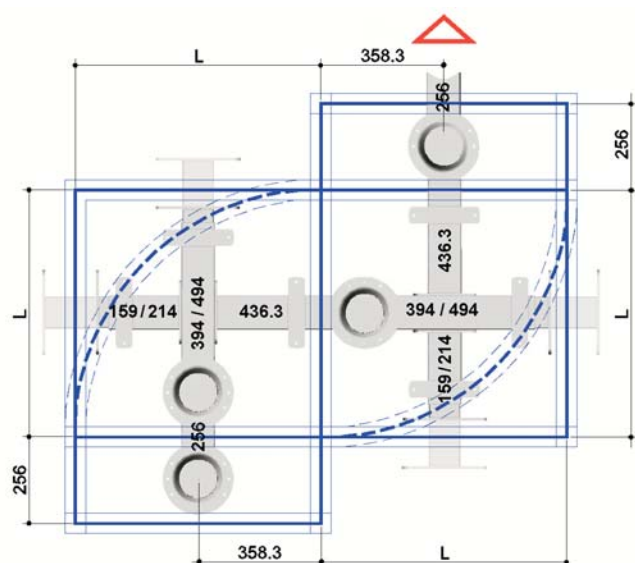

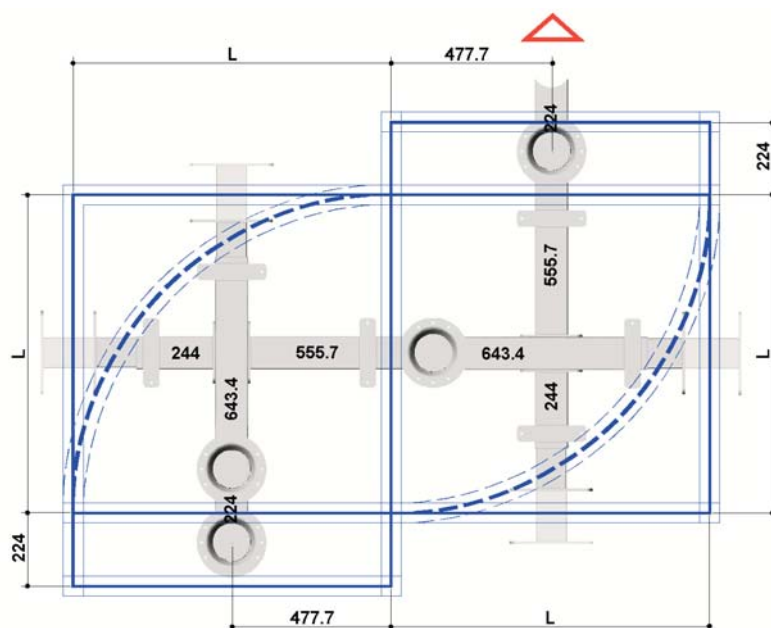

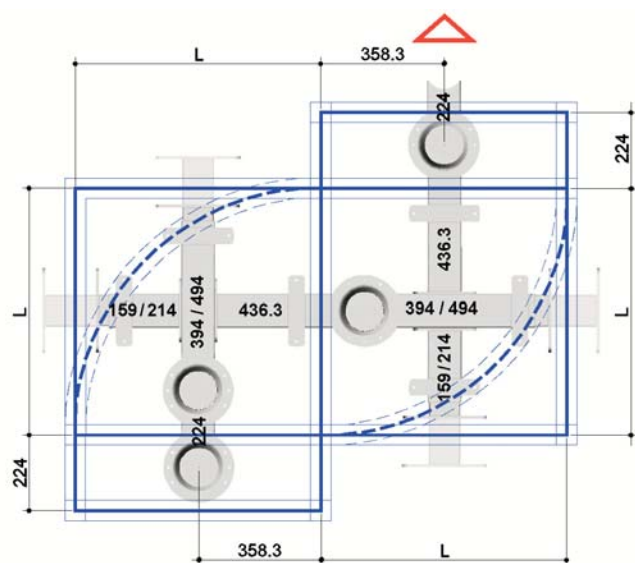

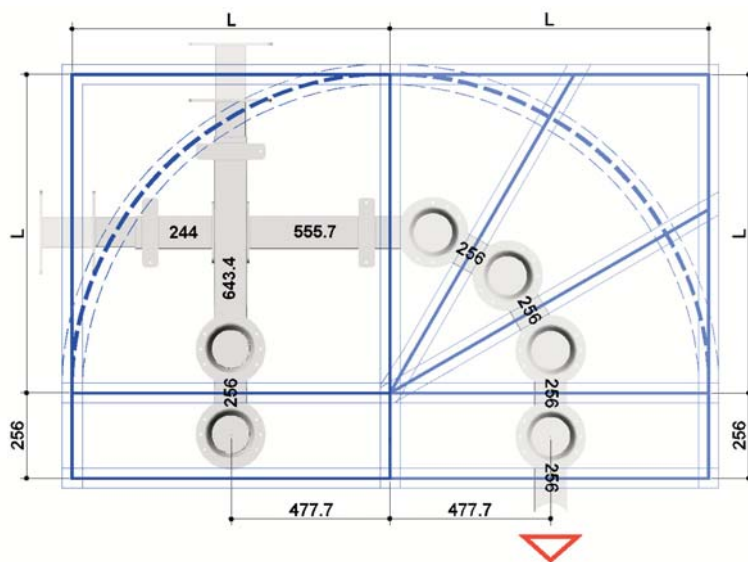

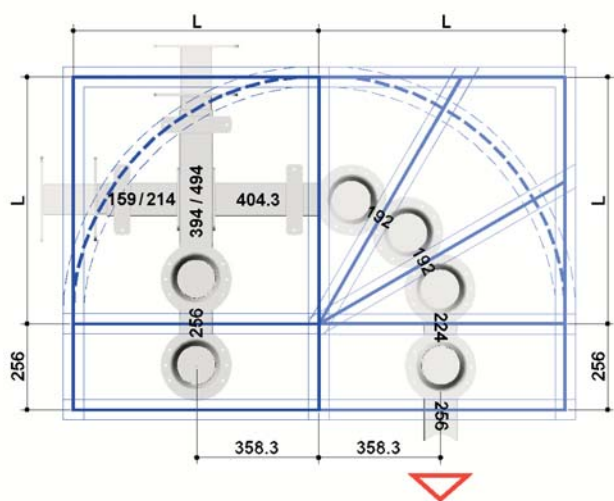

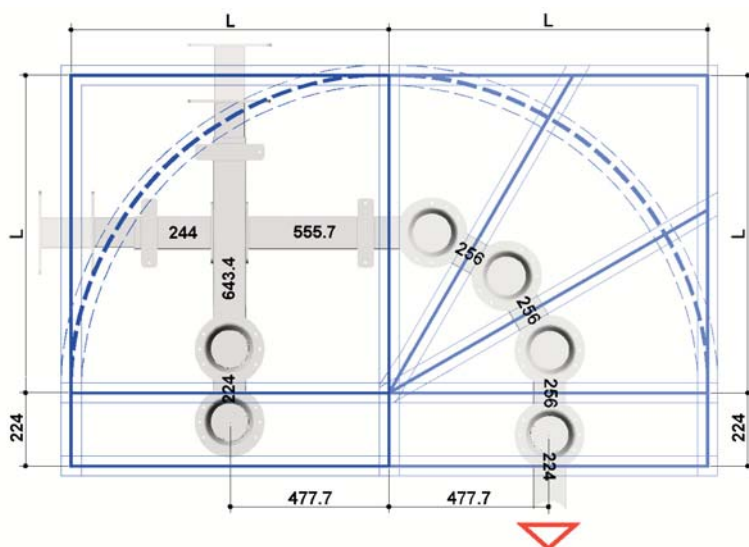

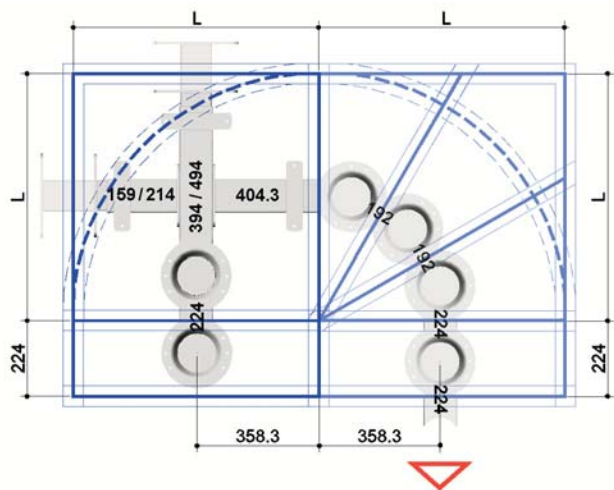

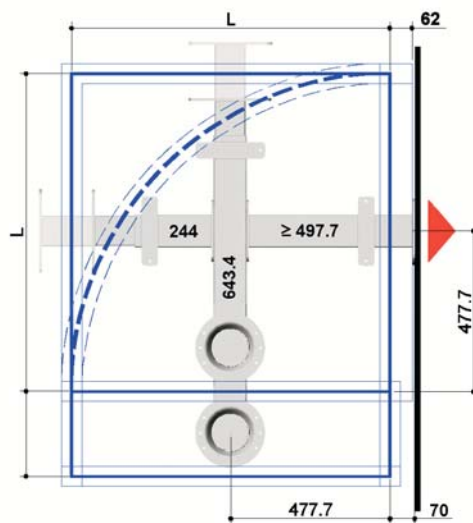

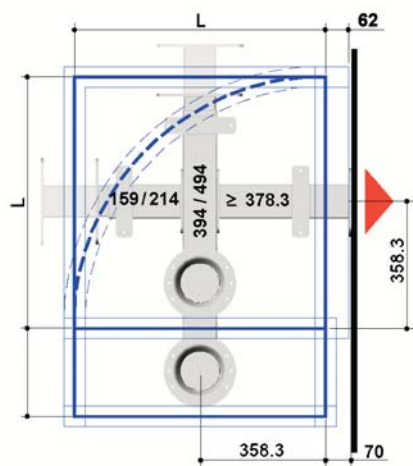

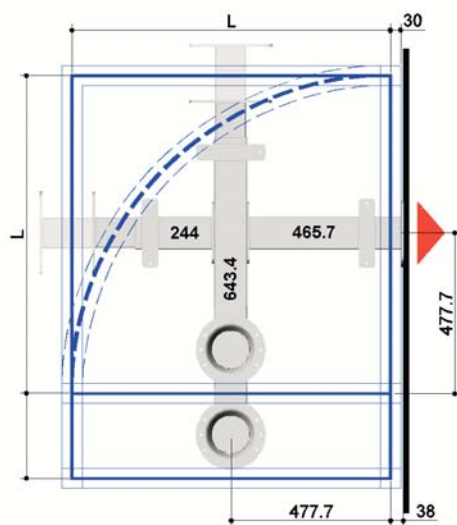

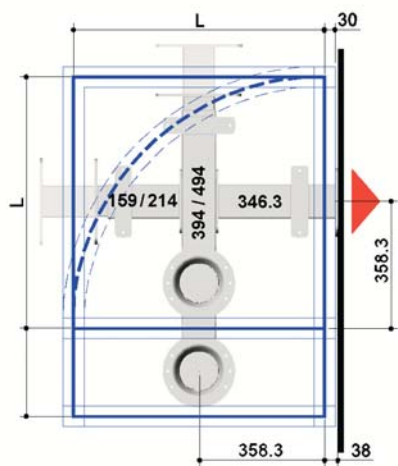

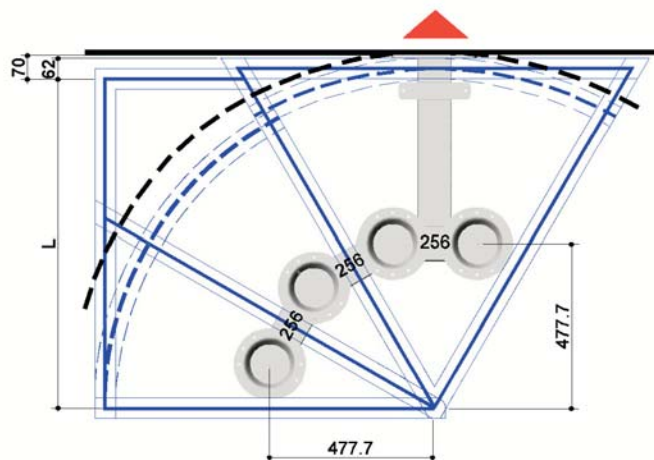

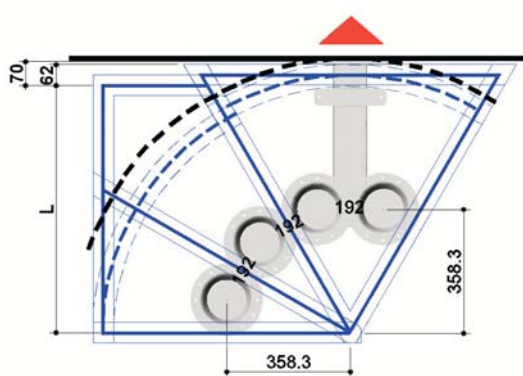

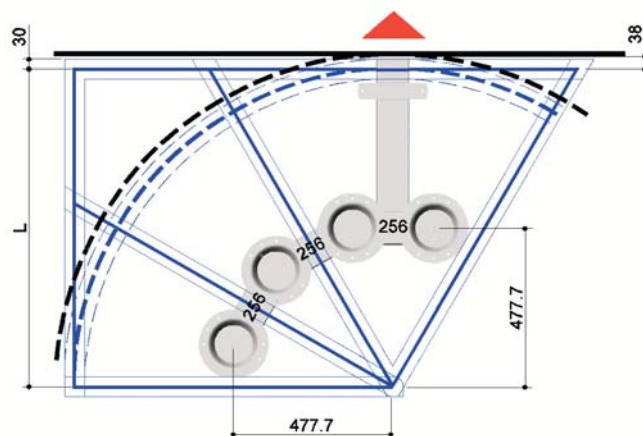

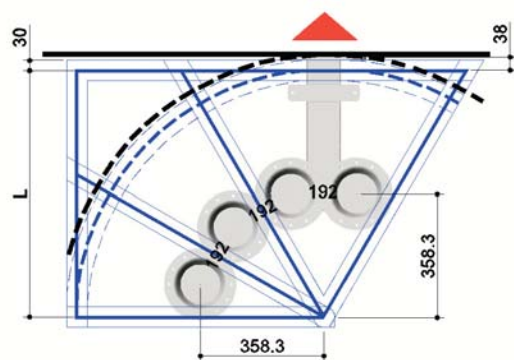

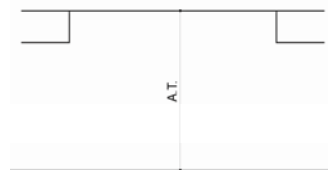

Modello V20

Struttura modulare in metallo

Nomenclatura:

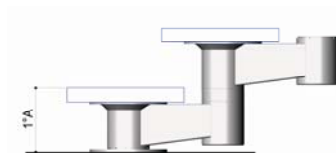

A.T. : Altezza totale rilevata fra piano inferiore e piano superiore.

A : Alzata rilevata fra 2 gradini contigui.

1°A : Prima Alzata rilevata fra il piano inferiore e 1° gradino ~ 190 mm

F.Q. : Filo Quota (l'ultimo gradino è alla stessa quota del piano superiore)

S.Q. : Sotto Quota (l'ultimo gradino è a un'alzata inferiore dal piano superiore)

Esempio di calcolo delle alzate:

A.T. = 2930 mm

A = N° 15 Alzate

1°A = ~ 190 mm (da sottrarre alle alzate totali)

(15 - 1°A) = 14 Alzate

Se arrivo a F.Q. N° 14 Alzate (12 da 195 mm + 2 da 200 mm)

Se arrivo S.Q. (14 - 1) = N° 13 Alzate (12 da 195 mm + 1 da 200 mm)
